## MANAGEMENT COMMENTS

The interim consolidated financial report of ZoomMed Inc. for the three-month periods ended August 31, 2012 and August 31, 2011 and all information contained in this interim consolidated financial report is the responsibility of the management and has been approved by the Board of Directors.

The consolidated interim financial report was prepared by the management in accordance with International Financial Reporting Standards ("IFRS") and is consistent with the Company's business.

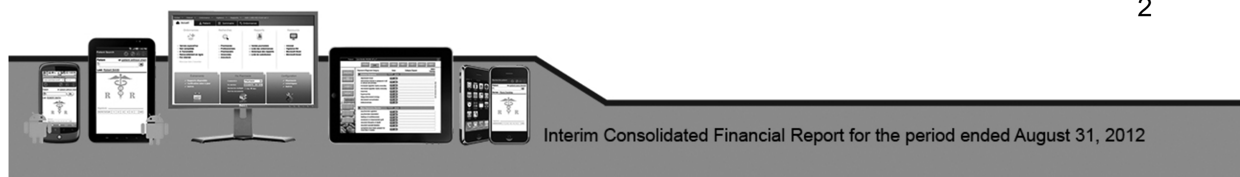
The Company complies with its TSX Venture Exchange listing agreement. The Company maintains rigorous systems of internal accounting and administrative controls to provide reasonable assurance that the financial information is relevant, reliable and accurate and that the assets are correctly accounted for and protected.

Every year the Board of Directors appoints an Audit Committee composed of a majority of directors who are neither Company officers nor employees. The Audit Committee meets periodically with Management and the external auditors to review their tasks and discuss the audit, accounting policies and related financial matters. The results of their audit are discussed as well. The Audit Committee also reviews the financial statements and the independent auditors' report and recommends their approval by the Board of Directors.

The interim consolidated financial report for the three-month periods ended August 31, 2012 and August 31, 2011, has not been reviewed or audited by independent auditors.

October 19, 2012

**Yves Marmet,**
President and Chief Executive Officer



## CONSOLIDATED STATEMENTS OF FINANCIAL POSITION
## AS AT AUGUST 31, 2012 AND MAY 31, 2012

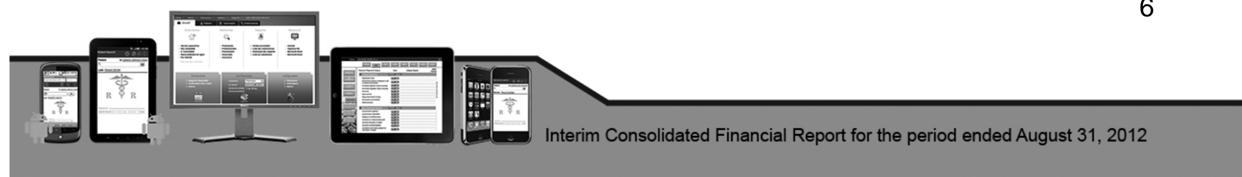
| **CASH AND CASH EQUIVALENTS, END OF YEAR** | 880,607 | 241,162 |

Cash flows used in operating activities include interest expenses of $56,250 and no interest income for the three-month period ended August 31, 2012. No interest expense or interest income was recorded for the three-month period ended August 31, 2011.



## 1. GENERAL INFORMATION

ZoomMed Inc. (“ZoomMed”) was incorporated under the Canada Business Corporations Act on February 24, 2005.

ZoomMed Inc. and its subsidiaries (the “Company”) are committed to the development and the marketing of a broad range of computer applications designed for healthcare professionals.

The Company has developed the “ZRx Prescriber”, a technological innovative Web application that enables physicians to use a wireless device, such as IPhone™, IPad™, Google Android™ or computers, to write and rapidly deliver scripts. Since it is a stand-alone product, it can easily be integrated to any Electronic Medical Record application (EMR).

The Company's “e-Pic Communication Network” is a clinical information exchange platform between physicians and the various other stakeholders of the healthcare sector, such as pharmacists, specialists, pharmaceutical corporations, laboratories, specialized clinics and others.

Furthermore, the Company also offers “PraxisLab” new pharmacy management software that enhances all aspects of the prescription filling process and the complete pharmacists patient file management. PraxisLab uses state-of-the-art protocols and up-to-date software standards.

The ensuing communication and management improvement enhances the healthcare system and allows patients to have access to faster and more secure services.

ZoomMed Inc. common shares are trading on the TSX Venture Exchange under ZMD symbol.

The Company’s registered head office is located at 6300 Auteuil Street, Suite 121, Brossard, Québec, Canada, J4Z 3P2.

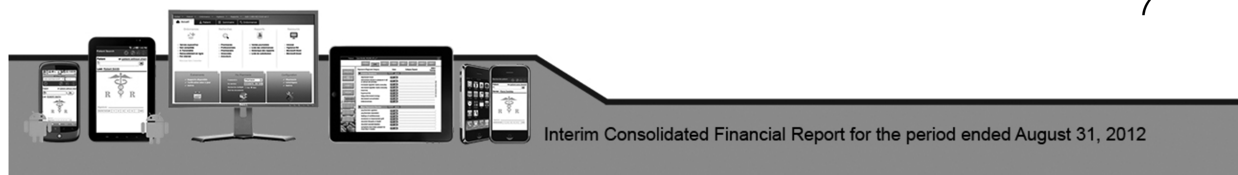
## 2. BASIS OF PRESENTATION OF FINANCIAL STATEMENTS AND ADOPTION OF IFRS

The Company prepares its interim consolidated financial statements in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements including International Accounting Standard 34, “Interim Financial Reporting” (“IAS 34”). They have been prepared using the same accounting policies and method of computation as the annual consolidated financial statements for the fiscal year ended May 31, 2012. The disclosures provided below are incremental to those included with the annual consolidated financial statements. Certain information and disclosures normally included in the notes to the annual consolidated financial statements have been condensed or have been disclosed on an annual basis only. Accordingly, these interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the fiscal year ended May 31, 2012, which have been prepared in accordance with IFRS as issued by the IASB.

The preparation of interim consolidated financial statements, in accordance with IAS 34, is based on the assumption of continuity of operations of the Company in the foreseeable future, that is to say that it will be able to realize its assets and discharge its liabilities in the normal course of operations.

The continuation and growth of the Company’s activities depend on its ability to gain profitability and to obtain additional financing or cash provided by operations. These funds will come from share issue, either from public or private placement or strategic alliances, or other financing sources. At this stage, it is impossible to predict if those elements will materialize.

The interim consolidated financial statements do not reflect adjustments that should be made to the book value of assets and liabilities in the case where the Company would be unable to realize its assets and discharge its liabilities in the normal course of operations.



## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Basis of measurement

These consolidated financial statements have been prepared under the historical cost convention, except for other measurement bases, as indicated in the related notes.

### Consolidation

The interim consolidated financial statements include the accounts of ZoomMed Inc. and its subsidiaries ZoomMed Médical Inc., Praxis Santé Inc., 9205-1051 Québec Inc. and ZoomMed USA Inc.

### Revenue recognition

In general, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the amount can be measured reliably. Revenue comprises the fair value of the consideration received or receivable for services in the ordinary course of the Company's activities.

Revenue derived from annual contracts, related to the e-Pic Communication Network, are recognized using the straight-line method over the duration of the agreements. As provided in these contracts, payments received in advance are recorded as deferred revenue in the consolidated statements of financial position, and then, as operating revenue as the service is rendered.

Interest revenue is recorded on a fiscal year basis according to the effective interest rate method.

### Financial Instruments

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below.

Their classification depends on the purpose which the financial instruments were acquired or issued, their characteristics and their designation by the company. Settlement date accounting is used.

All financial assets, except those designated at fair value through profit or loss, are subject to an annual impairment test and written down when there is an indication of impairment. The impairment loss is the excess of the carrying value over fair value and is recorded in the consolidated statements of comprehensive income.

The classification and measurement of the Company's financial instruments are determined as follows:

**Financial assets at fair value through profit or loss** – All instruments included in this category meet the definition of financial assets held for trading. Financial instruments held for trading are instruments that are held for the purpose of selling in the short term. Instruments in this category include cash and cash equivalents. They are measured initially and subsequently at fair value and changes in fair value are recognized in the consolidated statements of comprehensive income in financial income or financial expenses in the period in which they occur. Directly attributable transaction costs are recognized in comprehensive income.

**Loans and receivables** - Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company includes accounts receivable in this category.

Financial instruments included in this category are initially recognized at fair value plus directly attributable transaction costs. Subsequently, loans and receivables are measured at amortized cost using the effective interest method.

**Other liabilities** - Financial instruments included in this category are initially recognized at fair value and transaction costs are deducted from the fair value. Subsequently, other liabilities are measured at amortized cost. The Company includes accounts payable, as well as the liability component of convertible debenture, in this category.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

**Compound instruments** - The components of compound instruments issued by the Company are classified separately as financial liabilities and equity in accordance with the contractual agreement. At the date of issue, the fair value of the liability component is estimated using the market interest rate then in effect for a similar convertible instrument. This amount is recorded as a liability, at amortized cost, using the effective interest rate method until its expiry at the time of conversion or maturity of the instrument. The equity component is determined by deducting the amount of the liability component of the total fair value of the compound instrument. This amount is recognized in equity, net of income tax effects, and is not subsequently remeasured. Transaction costs related to the issuance of the convertible debenture are allocated to the liability and equity components in proportion to their initial carrying amounts. Transaction costs related to the equity component are recognized directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortized over the life of the debenture using the effective interest method.

### Cash and cash equivalents

Cash and cash equivalents consist of cash in hand, bank balances, short-term liquid investments with maturities of less than three months and bank overdrafts, if any, which are classified as a category at fair value through profit or loss.

### Interest in joint venture

The Company has joint control of a separate entity when it is entitled to participate to the entity's financial and operating strategic decisions, which exists only when these decisions require the unanimous consent of the parties sharing control.

The Company recognizes its interest in a jointly controlled entity using the equity method. The equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the investor's share of the investee's net assets.

The participating interest in the net income of the investee is recognized in the consolidated statements of comprehensive income.

The unrealized gains and losses resulting from transactions between the Company and its jointly controlled entities are eliminated to the extent of the Company's interest in the joint venture.

### Fixed assets

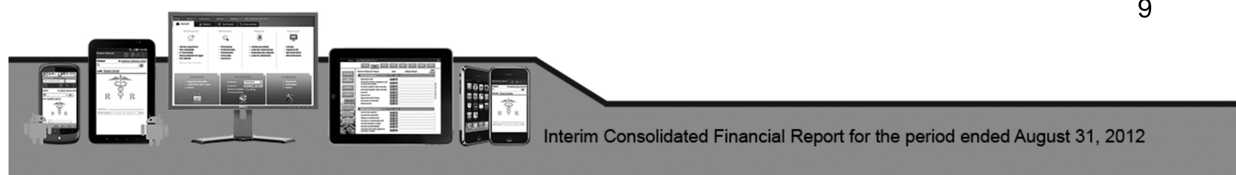
Fixed assets are initially recorded at cost, including acquisition fees and all the preparation fees directly related to the asset before it can be used, less related research and development investment tax credits. Subsequent to the initial measurement, fixed assets are recorded at cost, less accumulated amortization and depreciation.

Amortization is recognized on a straight-line basis, in line with the assets useful life, as follows:

| | Method | Periods |
|---|---|---|
| Furniture | Straight-line | 5 years |
| Computer equipment | Straight-line | 3 years |
| Computer equipment for ZRx Prescriber | Straight-line | 3 years |
| Leasehold improvements | Straight-line | 5 years |

The Company allocates the amount initially recognized in respect of a fixed asset to its significant parts and depreciates separately each such part. Residual values, method of amortization and useful life of the assets are reviewed annually and adjusted if appropriate.

Gains and losses on disposals of fixed assets are determined by comparing the proceeds with the carrying amount of the asset and are included as part of other gains and losses in the consolidated statements of comprehensive income.



## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

### Intangible assets

The Company's intangible assets include Website, intellectual properties, licenses and rights, development costs and software with finite useful lives. These assets are capitalized and amortized on a straight-line basis in the consolidated statements of comprehensive income over the period of their expected useful life as follows:

| | Periods |
|---|---|
| Website | 3 years |
| Software | 2 years |
| Intellectual properties | 10 years |
| Licenses and rights | 3 years |
| Development costs | 3 years |

Expenses related to development activities which do not meet generally accepted criteria for deferral and research activities are expensed as incurred. Development expenses which meet generally accepted criteria for deferral are capitalized and amortized against income over the estimated period of benefit.

The ZRx Prescriber intellectual property is recorded at cost and is amortized over a ten-year period from the marketing date of the product, which is November 2006. The PraxisLab intellectual property is recorded at cost and is amortized over a ten-year period from the date of acquisition.

The ZRx Prescriber development costs, which include the development of the e-Pic Communication Network and the additional new functionalities, according to future economic benefits, are amortized using the straight-line method over a three-year period from the implementation date of the product. PraxisLab development costs will be amortized using the straight-line method over a three-year period from the marketing date of the product.

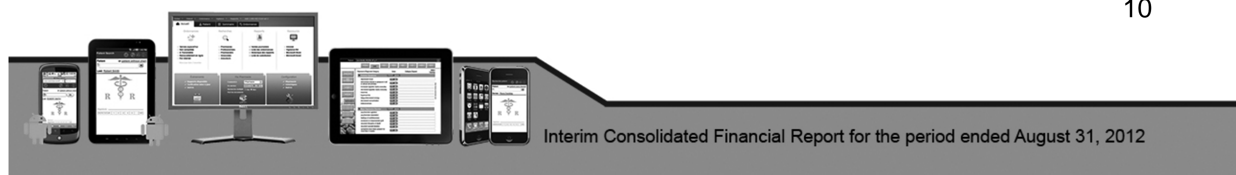
### Research and development tax credits

The Company is entitled to scientific research and development tax credits. Tax credits are accounted for using the cost reduction method. Accordingly, tax credits are recorded as a reduction of the related expenses or capital expenditures in the period in which those expenses are incurred, provided there is reasonable assurance that the credits will be realized.

### Impairment of long-term assets non-financial

Non-current assets with indefinite useful lives are not amortized and are tested for impairment annually. Non-current assets with a finite useful life are assessed for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable. Management is required to asses at each reporting date whether there is any indication that an asset may be impaired. Where such an indication exists, the asset's recoverable amount is compared to its carrying value and an impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows or cash-generating units ("CGU"). In determining value in use of a given asset or CGU, estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Non-current assets with finite useful life that suffered impairment are reviewed for possible reversal of the impairment if there has been a change, since the date of the most recent impairment test, in the estimates used to determine the impaired asset's recoverable amount. However, an asset's carrying amount, increased due to the reversal of a prior impairment loss, must not exceed the carrying amount that would have been determined, net of depreciation or amortization, had the original impairment not occurred.



## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

### Lease inducement

The lease inducement includes the difference between the rental expense apportioned over the lease term according to a systematic formula and the minimum lease payment, considering the inducements.

### Operating Leases

Leases under which the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments under an operating lease (less benefit received from the lessor) are recognized in the consolidated statements of comprehensive income on a straight line basis over the lease term.

### Shareholders' Equity

Common shares are classified as equity and are recorded in the Shareholders' Equity at their issuance value. Incremental costs directly attributable to the issuance of shares and stock options are shown in equity as a deduction (as a deficit increase) net of tax from the proceeds. Transactions with shareholders are shown separately in equity.

### Income taxes

Income taxes are accounted for, by the Company, based on the consolidated statements of financial position method. Accordingly, future income tax assets and income tax liabilities are measured using the income tax rates that are most likely to apply during the fiscal year where the asset is realized or the liability is settled, based on the income tax rates (and tax regulations) adopted or nearly adopted as at the reporting date. As appropriate, a valuation allowance is recognized to decrease the value of future tax assets to an amount that is more likely than not to be realized.

### Employee's benefits

Wages, contributions to government pension plans, paid vacations and sick leaves, bonuses and non-monetary benefits are short-term benefits and are recognized over the period during which the employees of the company have rendered the related services.

### Stock-based compensation

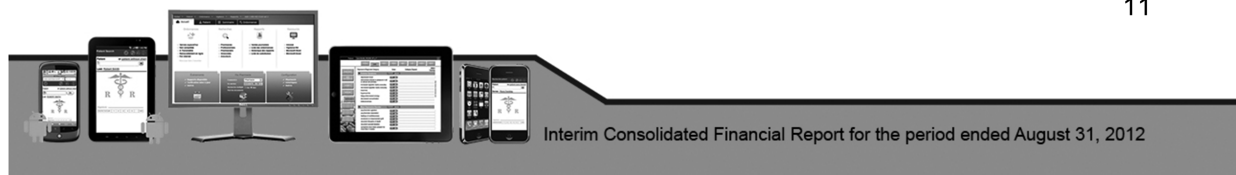
The Company offers a stock-based compensation plan. The Company uses the fair value based method of accounting as regards to stock options granted to its Officers, Directors, Employees and Consultants. The fair value of stock options is determined using the Black-Scholes option pricing model, and the stock-based compensation costs are recorded in the consolidated statements of comprehensive income at the granted date and credited to contributed surplus.

Any consideration received by the Company in connection with the exercise of stock options is credited to share capital and contributed surplus component of the stock-based compensation is transferred to share capital upon the issuance of shares.

### Accounts denominated in foreign currencies

**Presentation currency and foreign currency operations** – The Canadian dollars is the Company's presentation currency, which is also the Company's functional currency.

Foreign currency transactions are translated into the functional currency environment in which the entity operates using the exchange rates prevailing at the dates of the transactions. Assets and liabilities denominated in foreign currencies at the closing date are converted into functional currencies at the exchange rates prevailing at the same date. All resulting changes are recognized in the profit or loss, except monetary items included into foreign institution net investment.



## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

**Foreign institutions** - Foreign intuitions' assets and liabilities denominated in functional currencies other than Canadian dollars are converted into Canadian dollars using the exchange rates prevailing at the closing date. Foreign institution revenue and expenses are converted into Canadian dollars using the exchange rates prevailing at the date of the transaction. Shareholders equity is converted at the original effective rate prevailing at the closing date. All resulting changes are recognized in other comprehensive income until the net investment is disposed of, or reclassified in the profit or loss. Since the transition date, no such resulting change was recorded as foreign institutions conversion adjustments.

### Basic and fully diluted net earnings per share

Basic and fully diluted net earnings per share are calculated using the weighted average number of outstanding common shares during the fiscal year. The Company uses the treasury stock method to determine the dilutive effects of stock options and warrants when cumulating diluted earnings per share. Accordingly, the calculation of diluted earnings per share is made using the treasury stock method, as if all potentially dilutive participating shares had been exercised at the later of the beginning of the period or the date of issuance, as the case may be, and that the funds obtained thereby had been used to purchase common shares of the Company at the average market value of the common shares during the period.

When funds are received, at the date of issuance of dilutive instruments, the net amount is adjusted net of tax expenses related to these instruments.

For the three-month period ended August 31, 2012, the conversion of the debenture into common shares is anti-dilutive (no convertible debenture for the three-month period ended August 31, 2011) and therefore, was not included in the diluted earnings per share calculation.

The fully diluted net earnings per share are equal to the basic net earnings per share because of the anti dilutive effect of stock options and warrants when a loss is incurred.

## 4. ACCOUNTING STANDARDS ISSUED BUT NOT YET APPLIED

### Financial Instruments

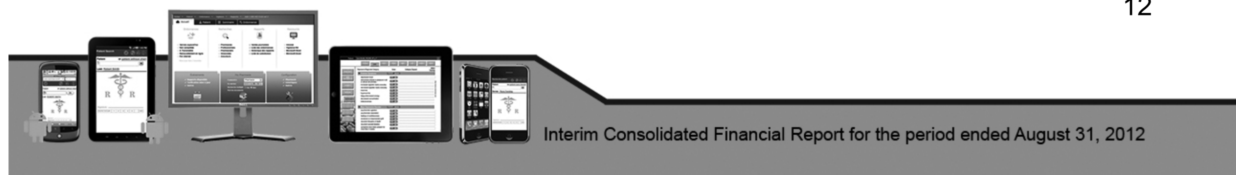
In October 2010, the International Accounting Standards Board “IASB” issued IFRS 9, “Financial Instruments”, which represents the completion of the first part of a three-part project to replace IAS 39, “Financial Instruments: Recognition and Measurement”, with a new standard. Per recent updates to IFRS 9, an entity choosing to measure a liability at fair value will present the portion of the change in its fair value due to changes in the entity’s own credit risk in the other comprehensive income or loss section of the entity’s statement of comprehensive income, rather than within profit or loss.

Thus, to determine whether a financial asset is measured at amortized cost or fair value, IFRS 9 uses a single approach that replaces the multiple rules in IAS 39. The recommended approach in IFRS 9 is based on how an entity manages its financial instruments and the characteristics of the contractual cash flows of financial assets.

This standard will be effective for financial statements periods beginning on or after January 1, 2015. Earlier application is permitted. The Company intends to adopt this new standard as its effective date. The Company has not yet assessed the potential impact of these new guidelines on its consolidated financial statements.

### Reporting entity

In May 2011, the IASB issued a group of five new standards that address the scope of the reporting entity: IFRS 10 “Consolidated financial statements”, IFRS 11 “Joint arrangements”, IFRS 12 “Disclosure of interests in other entities”, IAS 27 “Separate financial statements” and IAS 28 “Investments in associates”.



## 4. ACCOUNTING STANDARDS ISSUED BUT NOT YET APPLIED (CONT.)

**Consolidation** - IFRS 10 replaces all previous provisions related to control and consolidation stated in IAS 27 "Separate Financial Statements" and SIC-12 "Consolidation - Special Purpose Entities". IFRS 10 amends the definition of control and provides a single definition of the concept of control, which is characterized by the holding power of the entity, the exposure or the rights to variable returns of the entity. Power means the ability to manage the activities in a way that could significantly affect returns. Returns must vary and can be positive or negative, or both. The revised IAS 27 is a standard relating solely to the separate financial statements and its provisions are unchanged.

**Joint arrangements** - IFRS 11 amends the definition of a joint agreement so that it includes only two types of agreements: joint activities and joint ventures. Under this standard, the proportionate consolidation method is no longer permitted to account for jointly controlled entities, and the use of the equity method is mandatory for all participants in a joint venture. The entities involved in joint activities will use an accounting method very similar to the one that currently applies to jointly controlled assets and jointly controlled activities.

**Disclosures of interests in other entities** - IFRS 12 establishes requirements for disclosure applicable to entities subject to the provisions of IFRS 10 and IFRS 11, thereby replacing the requirements information set out in IAS 28. Under IFRS 12, entities should provide information that helps users of financial statements to evaluate the nature, risks and financial effects of the entity interests in subsidiaries, associated companies, joint agreements and unconsolidated structured entities.

These standards are required to be applied for accounting periods beginning on or after January 1, 2013, with earlier adoption permitted. The Company has not yet assessed the impact of these standards or determined whether it will adopt the standards early.

**Fair value measurement**

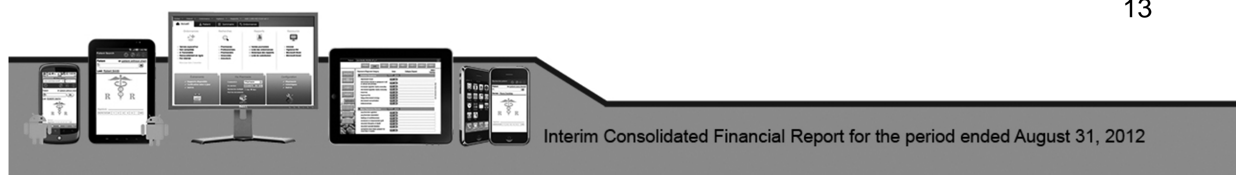
In May 2011, the IASB issued IFRS 13 "Fair value measurement". This standard will improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRS. IFRS 13 will be effective for fiscal years beginning on or after January 1, 2013, with earlier application permitted. The Company intends to adopt this new standard as its effective date. The Company has not yet assessed the potential impact of these new guidelines on its consolidated financial statements.

## 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of consolidated financial statements in accordance with IFRS often requires management to make estimates about and apply assumptions or subjective judgment to future events and other matters that affect the reported amounts of the Company’s assets, liabilities, revenue, expenses, and related disclosures. Assumptions, estimates and judgments are based on historical experience, expectations, current trends and other factors that management believes to be relevant at the time at which the Company’s consolidated financial statements are prepared. Management reviews, on a regular basis, the Company’s accounting policies, assumptions, estimates, and judgments in order to ensure that the consolidated financial statements are presented fairly and in accordance with IFRS.

Critical accounting estimates and judgments are those that have a significant risk of causing material adjustment and are often applied to matters or outcomes that are inherently uncertain and subject to change. As such, management cautions that future events often vary from forecasts and expectations and that estimates routinely require adjustment.

Management considers the following areas to be those where critical accounting policies affect the significant judgments and estimates used in the preparation of the Company’s consolidated financial statements.



## 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (CONT.)

**Estimated useful life**

The management assesses fixed assets in line with the assets useful life. The amount and the related fixed assets amortization timetable for a given period are influenced by their estimated useful life. The estimations are reviewed at least once a year and are updated if the useful life expectations are altered by physical wear, technical and commercial obsolescence.

**Intangible assets**

The values associated with identifiable intangible assets with finite useful life are determined by applying significant estimates and assumptions.

Valuations performed in connection with post-acquisition assessments of impairment of identifiable intangible assets are based on estimates that include risk-adjusted future cash flows. Projected cash flows are based on business forecasts, trends and expectations and are therefore inherently judgmental. Future events could cause the assumptions utilized in impairment assessments to change, resulting in a potentially significant effect on the Company's future operating results due to increased impairment charges, or reversals thereof, or adjustments to amortization charges.

**Fair value of stock options**

Determining the fair value of the stock options requires judgment related to the choice of a pricing model, the estimation of stock price volatility and the expected term of the underlying instruments. Any changes in the estimates or inputs utilized to determine fair value could result in a significant impact on the Company's future operating results or other components of shareholders' equity.

**Government assistance**

The Company is entitled to government assistance in the form of research and development tax credits and grants. These are applied against related expenses and the cost of the asset acquired. Tax credits are available based on eligible research and development expenses consisting of direct and indirect expenditures and including a reasonable allocation of overhead expenses. Grants are subject to compliance with terms and conditions of the related agreements. Government assistance is recognized when there is reasonable assurance that the Company has met the requirements of the approved grant program or, with regard to tax credits, when there is reasonable assurance that they will be realized.

**Going concern**

The assessment of the Company's ability to execute its strategy by funding future working capital requirements involves judgment. Further information regarding going concern is outlined in Note 2.

## 6. ACCOUNTS RECEIVABLE

| | August 31, 2012 | May 31, 2012 |
|---|---|---|
| | $ | $ |
| Accounts receivable | 390,318 | 229,583 |
| Accounts receivable – Joint venture [1] | - | 103,763 |
| Research and development tax credits[2] | 125,000 | 125,000 |
| | 515,318 | 458,346 |

[1] The joint venture (note 9) has pledged to pay $986,020, over a 14 month period, for the development of a behavioral healthcare system.
[2]The exact amount will be known when Revenu Québec will process and approve the claim. Approved amount could differ from the recorded amount.

| **Net book value as at May 31, 2012** | - | - | - | 2,032,597 | 993,352 | 3,025,949 |

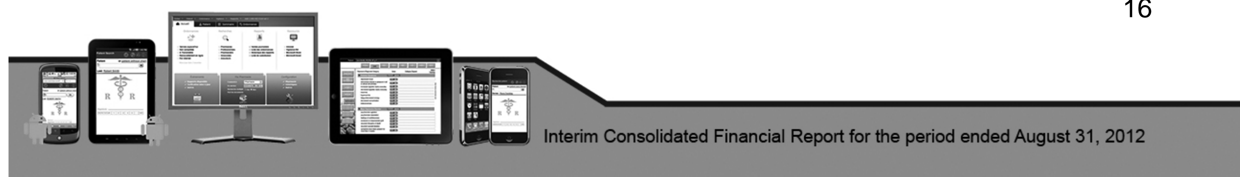
During fiscal year 2012, the Company applied tax credits, totalling $147,503, as a reduction of capitalized development costs.

## 9. INTEREST IN JOINT VENTURE

Since May 29, 2012, the Company holds 40% of the equity shares and 50% of the voting shares in EvEMR's joint venture, which was established to implement and commercialize, throughout North America, an Electronic Medical Record (EMR) designed for all behavioural health providers. It will be a modular product built around a smart clinical note-writer application. The joint venture fiscal year is December 31.

The aggregate amounts of each of the current assets, non-current assets, current liabilities, non-current liabilities, revenue and expenses related to the interest in EvEMR are as follows:

| | August 31, 2012 | May 31, 2012 |
|---|---|---|
| | $ | $ |
| Current assets | 4,000 | 4,000 |
| Non-current assets | 137,751 | 41,505 |
| Total assets | 141,751 | 45,505 |
| Current liabilities | 137,751 | 41,505 |
| Non-current liabilities | - | - |
| Total liabilities | 137,751 | 41,505 |
| Net assets | 4,000 | 4,000 |
| Total revenue | - | - |
| Total expenses | - | - |
| Total income for the period | - | - |
| Interest in joint venture | 4,000 | 4,000 |



## 10. ACCOUNTS PAYABLE

| | August 31, 2012 | May 31, 2012 |
|---|---|---|
| | $ | $ |
| Accounts payable and accrued liabilities | 190,794 | 220,856 |
| Wages and deductions at source | 247,377 | 341,559 |
| Sales tax | 19,478 | 132,628 |
| | 457,649 | 695,043 |

## 11. CONVERTIBLE DEBENTURE

On September 30, 2011, the Company has issued a secured convertible debenture for a principal amount of $1,500,000, such convertible debenture being convertible at the sole option of the holders thereof into common shares of the share capital of the Company on the basis of one common share for each $0.15 in principal amount of convertible debenture. Furthermore, 10,000,000 common shares purchase warrants were issued. Each warrant entitles the holder thereof to purchase one common share at a price of $0.15 per share for 24 months following the closing date. The convertible debenture matures 24 months from the date of issuance or such earlier date which may be provided for as a redemption feature. Subject to certain conditions, the Company may redeem all or any portion of the convertible debenture upon 30 days written notice to the holders thereof in which case such holders may exercise their conversion rights, in whole or in part, prior to the intended date of redemption. The convertible debenture bears a nominal interest rate of 15% per annum and matures in September 2013. The convertible debenture is secured by a movable hypothec on the assets of the Company and a promissory note.

The net proceeds from the issuance of the convertible debenture has been separated into a liability component and an equity component, representing the residual amount attributable to the conversion option of the liability into equity of the Company as shown in the following table:

| | | |
|---|---|---|
| Proceeds from issuance | $ | 1,500,000 |
| Fair value of the liability component, at the date of issue, for a similar instrument that does not have an equity conversion | $ | (1,425,797) |
| Fair value of the equity component | $ | 74,203 |

Issuance costs were proportionally allocated to the liability and the equity components. The $1,262,140 liability component, net from the $163,657 issuance costs, is measured at amortized cost, using 25.35% effective interest method. The $65,686 equity component, net of the $8,517 issuance costs, is shown as equity component of convertible debenture into equity.

Interest expenses on this loan are calculated by applying an effective interest rate of 25.35%. The liability component is measured at amortized cost. The difference between the carrying value of the $1,262,140 liability component, at the date of issuance and the $1,357,217 ($1,329,028 as at May 31, 2012) amount presented in the consolidated statement of financial position, as at August 31, 2012, reflects the effective interest rate, less interest paid as of that date.

## 12. OPERATING EXPENSES

| | August 31, 2012 | August 31, 2011 |
|---|---|---|
| | $ | $ |
| **a)** Selling expenses: | | |

### c) Transactions during the period ended August 31, 2012

No transactions occurred during the period ended August 31, 2012.

### d) Transactions during 2012

No transactions occurred during the fiscal year ended May 31, 2012.

### e) Share capital reconciliation

| | Number | Declared |
|---|---|---|
| Balance as at August 31, 2012 and May 31, 2012 | 130,474,687 | 25,438,120 |

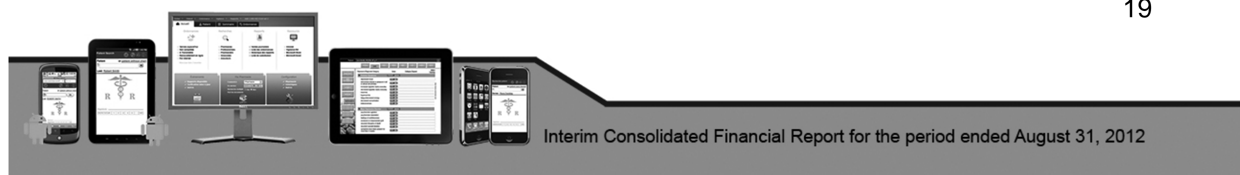
## 15. STOCK OPTION PLAN

The shareholders of the Company approved a resolution modifying the stock option plan from a 10% “fixed” stock option plan to a 10% “rolling” stock option plan as described in the management proxy circular for the annual and special meeting of shareholders held November 25, 2011. Under the plan terms, the exercise price of the options will be determined by the Directors of the Company subject to other restrictions described in the plan and some requirements of the TSX Venture Exchange. The maximum period for which an option can be exercise is limited to five years and the exercise price must be paid in full before the issuance of the shares.

The following table summarizes the changes in the plan position for the three-month period ended August 31, 2012 end the fiscal years ended May 31, 2012:

| | Options | Average exercise price |
|---|---|---|
| | | $ |
| Balance as at May 31, 2011 | 10,194,000 | 0.29 |
| Awarded | 4,740,000 | 0.15 |
| Cancelled | (5,681,500) | 0.36 |
| Balance as at May 31, 2012 | 9,252,500 | 0.18 |
| Awarded | 3,830,000 | 0.10 |
| Cancelled | (70,000) | 0.14 |
| Balance as at August 31, 2012 | 13,012,500 | 0.15 |

The following table summarizes the information about the outstanding stock options for the three-month period ended August 31, 2012 and the years ended May 31, 2012.



## 15. STOCK OPTION PLAN (CONT.)

### a) As at August 31, 2012

| Outstanding options | | | Exercisable options | |
|---|---|---|---|---|
| Number | Weighted average remaining contractual life (months) | Weighted average exercise price | Number | Weighted average exercise price |
| | | $ | | $ |
| 2,180,000 | 11 | 0.20 | 2,180,000 | 0.20 |
| 100,000 | 24 | 0.32 | 100,000 | 0.32 |
| 2,367,500 | 40 | 0.20 | 2,367,500 | 0.20 |
| 35,000 | 40 | 0.20 | 35,000 | 0.20 |
| 4,500,000 | 51 | 0.15 | 4,500,000 | 0.15 |
| 3,830,000 | 59 | 0.10 | 3,830,000 | 0.10 |
| 13,012,500 | 44 | 0.15 | 13,012,500 | 0.15 |

**Transaction during the period ended August 31, 2012**

In July 2012, the Company granted 3,830,000 stock options allowing their holders to acquire 3,830,000 common shares, at an exercise price of $0.10 per share, for a period of five years.

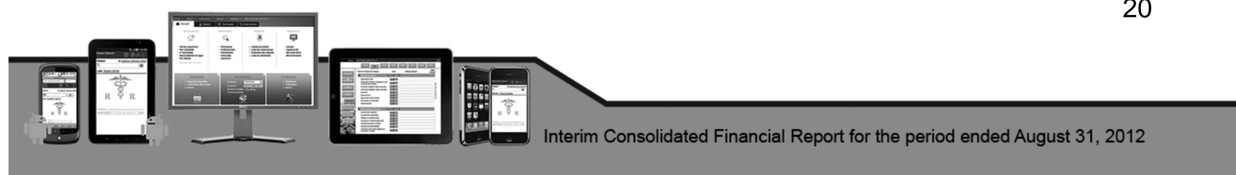
The fair value of the stock options awarded during the three-month period ended August 31, 2012 was estimated on the grant date using the Black-Scholes' options pricing model with the following assumptions:

| | **August 31, 2012** |
|---|---|
| Date | July 20, 2012 |
| Quantity | 3,830,000 |
| Stock price | $0.045 |
| Dividend yield | Nil |
| Expected volatility | 100% |
| Risk-free interest rate | 1.15% |
| Expected life | 60 months |

The non-recurrent stock-based compensation expense amounts to $107,240 for the three-month period ended August 31, 2012.

### b) As at May 31, 2012

| Outstanding options | | | Exercisable options | |
|---|---|---|---|---|
| Number | Weighted average remaining contractual life (months) | Weighted average exercise price | Number | Weighted average exercise price |
| | | $ | | $ |
| 2,205,000 | 14 | 0.20 | 2,205,000 | 0.20 |
| 100,000 | 27 | 0.32 | 100,000 | 0.32 |
| 2,382,500 | 43 | 0.20 | 2,382,500 | 0.20 |
| 35,000 | 43 | 0.20 | 35,000 | 0.20 |
| 4,530,000 | 54 | 0.15 | 4,530,000 | 0.15 |
| 9,252,500 | 41 | 0.18 | 9,252,500 | 0.18 |



## 15. STOCK OPTION PLAN (CONT.)

**Transaction during 2012**

In November 2011, the Company granted 4,740,000 stock options which entitle the holders to purchase 4,740,000 common shares at an exercise price of $0.15 per share for a period of five years.

The fair value of the stock options awarded during the fiscal year ended May 31, 2012 was estimated on the grant date using the Black-Scholes' options pricing model with the following assumptions:

| | **May 31, 2012** |
|---|---|
| Date | November 30, 2011 |
| Quantity | 4,740,000 |
| Stock price | $0.075 |
| Dividend yield | Nil |
| Expected volatility | 100% |
| Risk-free interest rate | 1.46% |
| Expected life | 60 months |

The non-recurrent stock-based compensation expense amounts to $229,890 for the fiscal year ended May 31, 2012.

## 16. WARRANTS

The following table summarizes the changes in the plan position for the three-month period ended August 31, 2012 and the fiscal year ended May 31, 2012.

| | Warrants | Weighted average Exercise price | Value |
|---|---|---|---|
| | | $ | $ |
| Balance as at May 31, 2011 | 8,711,768 | 0.17 | 768,676 |
| Warrants awarded to the debenture holders | 10,000,000 | 0.15 | - |
| Balance as at May 31, 2012 | 18,711,768 | 0.16 | 768,676 |
| | - | - | - |
| Balance as at August 31, 2012 | 18,711,768 | 0.16 | 768,676 |

**a) Transactions during the period ended August 31, 2012**

No transactions occurred during the period ended August 31, 2012.

| Outstanding warrants | | |
|---|---|---|
| Number | Weighted average remaining contractual life (months) | Weighted average exercise price |
| | | $ |
| 6,427,742 | 6 | 0.17 |
| 514,219 | 6 | 0.17 |
| 1,638,710 | 7 | 0.17 |
| 131,097 | 7 | 0.17 |
| 10,000,000 | 13 | 0.15 |
| 18,711,768 | 10 | 0.16 |

## 16. WARRANTS (CONT.)

### b) Transactions during 2012

On September 30, 2011, in connection with the convertible debenture, the Company issued 10,000,000 warrants. Each warrant entitles the holders thereof to purchase one common share at a price of $0.15 per share for 24 months following the closing date.

The following table summarizes the information about the outstanding warrants owned by public investors and agents as at May 31, 2012.

| Outstanding warrants | | |
|---|---|---|
| Number | Weighted average remaining contractual life (months) | Weighted average exercise price |
| | | $ |
| 6,427,742 | 9 | 0.17 |
| 514,219 | 9 | 0.17 |
| 1,638,710 | 10 | 0.17 |
| 131,097 | 10 | 0.17 |
| 10,000,000 | 16 | 0.15 |
| 18,711,768 | 13 | 0.16 |

## 17. FAIR VALUE OF FINANCIAL INSTRUMENTS

| Financial assets | August 31, 2012 | | May 31, 2012 | |
|---|---|---|---|---|
| | Fair value | Carrying value | Fair value | Carrying value |
| | $ | $ | $ | $ |
| Cash and cash equivalents | 880,607 | 880,607 | 1,464,714 | 1,464,714 |
| Loans receivables | 390,318 | 390,318 | 333,346 | 333,346 |
| **Financial liabilities** | | | | |
| Other liabilities | 56,295 | 56,295 | 94,725 | 94,725 |
| Convertible debenture | 1,456,890 | 1,357,217 | 1,447,981 | 1,329,028 |

The fair value of cash and cash equivalents, loans, receivables and other liabilities approximates their carrying value, because of the relatively short maturity of these instruments.

The Company categorizes its financial assets and liabilities measured at fair value using a hierarchy that consists of three levels, which reflects the significance of inputs used in their evaluation. The hierarchy of the fair value consists of the following levels:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. An active market for an asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Inputs that are supported by little or no market activities and that are significant to the fair value of assets or liabilities.

## 17. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONT.)

As at August 31, 2012 and May 31, 2012, the only financial instruments measured at fair value in the consolidated statements of financial position consist of cash and cash equivalents and were all classified in level 1.

## 18. RISK MANAGEMENT OF FINANCIAL INSTRUMENTS

The Company, through its financial instruments, is exposed to various risks without being exposed to risk concentrations. The Company is primarily exposed to credit risk, interest rate risk, market risk, liquidity risk and key personnel risk.

**Credit risk management**

Credit risk is the risk of financial loss for the Company, if a debtor does not meet its obligation. This risk arises mainly from the credit the Company grants its customers in the normal course of its activities.

Credit evaluations are performed continuously and the consolidated statements of financial position reflects a provision for doubtful debts. No qualitative assessment has been made, management has assessed the credit risk was not significant.

**Interest rate risk management**

The interest rate risk exists in times of fluctuating rates and when differences are expected in the cash flow matching of assets and liabilities.

The Company has no debt bearing interest at variable rates. In addition, it invests part of its liquidity in guaranteed interest rate financial instruments. These financial instruments represent a minimal risk for the Company.

**Market risk**

The future performance of the Company is dependent on the continued popularity of its existing products and its ability to develop and introduce products that gain acceptance and satisfy consumer preferences in targeted markets. The popularity of any of its products may decline over time as consumer preferences change or as new competing products are introduced in targeted markets. The development of new systems and their distribution within the targeted market, require significant investments.

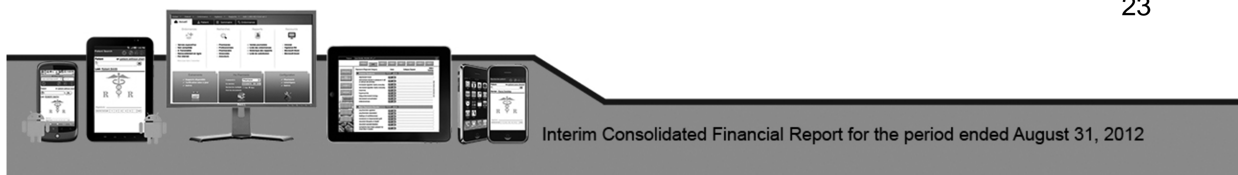
**Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to this risk mainly regarding its creditors and its convertible debenture.

In order to meet additional capital requirements, the Company may consider collaborative arrangements and additional public or private financing to fund all or a part of particular product development programs. Private financing could include the incurrence of debt and the issuance of additional equity securities, which could result in dilution to shareholders. There can be no assurance that additional funding will be available. The Company manages this risk by establishing detailed cash forecasts, as well as long-term operating and strategic plans. According to these forecasts, most of its cash flows for operating activities will be generated by the ZRx Prescriber, PraxisLab and the e-Pic Communication Network.

**Key personnel risk**

Recruiting and retaining qualified personnel is essential to the Company's success. The Company believe that it has been successful in recruiting excellent personnel to help it meet their objectives but, as its activities grow, it is possible that additional key personnel in departments like; administration, research and development, as well as marketing will be required. Although the Company believe that it will be successful in attracting qualified personnel, there can be no assurance to that effect.



## 19. CAPITAL DISCLOSURES

In regards to capital management, the Company's objective, from the beginning of its operations, is the continuity of its operations in order to carry on with the development and marketing of the ZRx Prescriber, PraxisLab and the e-Pic Communication Network, the protection of its assets, while maximizing the shareholders return on investment. The Company is not subject to any externally imposed capital requirements. The Company has several options regarding its capital needs. See Note 18 for more details.

The Company defines its capital as the sum of its shareholders equity and long-term debts. The shareholders equity ($587,536 as at August 31, 2012 and $581,787 as at May 31) includes: share capital, equity component of convertible debenture, warrants, contributed surplus and deficit. Long-term debts account for $1,357,217 as at August 31, 2012 and $1,329,028 as at May 31, 2012. The $5,749 capital increase, for the three-month period ended August 31, 2012, results from the cost of stock options granted, less the deficit of the period.

## 20. RELATED PARTIES

### a) Key management compensation

Key management is those persons having authority and responsibility for planning, managing and controlling the Company's activities, including the Directors and Executives. Key management participates to the stock option plan.
