MANAGEMENT COMMENTS

The interim consolidated financial report of ZoomMed Inc. for the three-month periods ended August 31, 2013 and 2012 and all information contained in this interim consolidated financial report is the responsibility of the management and has been approved by the Board of Directors.

The consolidated interim financial report was prepared by the management in accordance with International Financial Reporting Standards ("IFRS") and is consistent with the Company's business.

The Company complies with its TSX Venture Exchange listing agreement. The Company maintains rigorous systems of internal accounting and administrative controls to provide reasonable assurance that the financial information is relevant, reliable and accurate and that the assets are correctly accounted for and protected.

Every year the Board of Directors appoints an Audit Committee composed of a majority of directors who are neither Company officers nor employees. The Audit Committee meets periodically with Management and the external auditors to review their tasks and discuss the audit, accounting policies and related financial matters. The results of their audit are discussed as well. The Audit Committee also reviews the financial statements and the independent auditors' report and recommends their approval by the Board of Directors.

The interim consolidated financial report for the three-month periods ended August 31, 2013 and 2012, has not been reviewed or audited by independent auditors.

Cash flows used in operating activities includes interest expenses of $56,250 for the three-month periods ended August 31, 2013 and 2012.

1. GENERAL INFORMATION

ZoomMed Inc. ("ZoomMed") was incorporated under the Canada Business Corporations Act on February 24, 2005.

ZoomMed Inc. and its subsidiaries (the "Company") are committed to the development and the marketing of a broad range of computer applications designed for healthcare professionals.

The Company has developed the "ZRx Prescriber", a technological innovative Web application that enables physicians to use a wireless device, such as iPhone™, iPad™, Google Android™ or computers, to write and rapidly deliver scripts. Since it is a stand-alone product, it can easily be integrated to any Electronic Medical Record application (EMR).

"ZoomMed's communication network" is a clinical information exchange platform between physicians and the various other stakeholders of the healthcare sector, such as pharmacists, specialists, pharmaceutical corporations, laboratories, specialized clinics and others. The ensuing communication and management improvement enhances the healthcare system and allows patients to have access to faster and more secure services.

The Company also offers "PraxisLab" new pharmacy management software that enhances all aspects of the prescription filling process and the complete pharmacists patient file management. PraxisLab uses state-of-the-art protocols and up-to-date software standards.

The Company holds 50% of the voting and participating shares in the American joint venture EvEMR Inc., which commercializes, throughout North America, an Electronic Medical Record (EMR) designed for all behavioural health providers. This EMR provides a simplified solution to classify and categorize diagnostic criteria and statistical research on specific mental disorders of the DSM-5 (Diagnostic and Statistical Manual of Mental Disorders), a clinical decision tool based on psychiatric guidelines and generates educational material for patients, directly at the point of care. It is a modular product built around a clinical note-writer application. Furthermore, EvEMR acquired an exclusive license regarding the rights to distribute the ZRx Prescriber in the United States.

Moreover, since October 23, 2012, the Company holds 50% of the equity shares and 50% of the voting shares in EvEMR International Inc. joint venture, which was established to distribute products designed for all behavioral health providers throughout the world.

ZoomMed Inc. common shares are trading on the TSX Venture Exchange under ZMD symbol.

The Company's registered head office is located at 6300 Auteuil Street, Suite 121, Brossard, Québec, Canada, J4Z 3P2.

2. BASIS OF PRESENTATION OF FINANCIAL STATEMENTS AND ADOPTION OF IFRS

The Company prepares its interim consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These interim consolidated financial statements have been approved by the Board of Directors on October 18, 2013.

These interim consolidated financial statements have been prepared in accordance with a going concern. Under the going concern assumption, a Company is viewed as being able to continue its operations in the foreseeable future and realize its assets and discharge its liabilities in the normal course of operations.

The continuation and growth of the Company's activities depend on its ability to gain profitability and to obtain additional financing or cash provided by operations. These funds will come from share issue, either from public or private placement or strategic alliances, or other financing sources. At this stage, it is impossible to predict if those elements will materialize.

The interim consolidated financial statements do not reflect adjustments that should be made to the book value of assets and liabilities in the case where the Company would be unable to realize its assets and discharge its liabilities in the normal course of operations.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of measurement

These interim consolidated financial statements have been prepared under the historical cost convention, except for other measurement bases, as indicated in the related notes.

Consolidation

The interim consolidated financial statements include the accounts of ZoomMed Inc. and its subsidiaries ZoomMed Médical Inc., Praxis Santé Inc., 9205-1051 Québec Inc. and ZoomMed USA Inc.

Revenue recognition

In general, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the amount can be measured reliably. Revenue comprises the fair value of the consideration received or receivable for services in the ordinary course of the Company's activities.

Revenue derived from annual contracts, related to ZoomMed's communication network, is recognized using the straight-line method over the duration of the agreements. As provided in these contracts, payments received in advance are recorded as deferred revenue in the consolidated statements of financial position, and then, as operating revenue as the service is rendered.

Licensing revenue is recognized when the contract is signed.

Interest revenue is recorded on a fiscal year basis according to the effective interest rate method.

Financial Instruments

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below.

Their classification depends on the purpose which the financial instruments were acquired or issued, their characteristics and their designation by the Company. Settlement date accounting is used.

All financial assets, except those designated at fair value through profit or loss, are subject to an annual impairment test and written down when there is an indication of impairment. The impairment loss is the excess of the carrying value over fair value and is recorded in the consolidated statements of comprehensive income.

The classification and measurement of the Company's financial instruments are determined as follows:

Financial assets at fair value through net results – All instruments included in this category meet the definition of financial assets held for trading. Financial instruments held for trading are instruments that are held for the purpose of selling in the short term. Instruments in this category include cash and cash equivalents. They are measured initially and subsequently at fair value and changes in fair value are recognized in the consolidated statements of comprehensive income in financial income or financial expenses in the period in which they occur. The directly attributable transaction costs are recognized in comprehensive income.

Loans and receivables - Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company includes accounts receivable in this category. Financial instruments included in this category are initially recognized at fair value plus directly attributable transaction costs. Subsequently, loans and receivables are measured at amortized cost using the effective interest method.

Other liabilities - Financial instruments included in this category are initially recognized at fair value and transaction costs are deducted from the fair value. Subsequently, other liabilities are measured at amortized cost. The Company includes accounts payable, as well as the liability component of convertible debenture, in this category.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Compound instruments - The components of compound instruments issued by the Company are classified separately as financial liabilities and equity in accordance with the contractual agreement. At the date of issue, the fair value of the liability component is estimated using the market interest rate then in effect for a similar convertible instrument. This amount is recorded as a liability, at amortized cost, using the effective interest rate method until its expiry at the time of conversion or maturity of the instrument. The equity component is determined by deducting the amount of the liability component of the total fair value of the compound instrument. This amount is recognized in equity, net of income tax effects, and is not subsequently remeasured. Transaction costs related to the issuance of the convertible debenture are allocated to the liability and equity components in proportion to their initial carrying amounts. Transaction costs related to the equity component are recognized directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortized over the life of the debenture using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents consist of cash in hand, bank balances, short-term liquid investments with maturities of less than three months and bank overdrafts, if any, which are classified as a category at fair value through profit or loss.

Interest in joint ventures

The Company has joint control of separate entities when it is entitled to participate to the entities' financial and operating strategic decisions, which exists only when these decisions require the unanimous consent of the parties sharing control.

The Company recognizes its interest in jointly controlled entities using the equity method. The equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the investor's share of the investee's net assets.

On acquisition of the participating interest, any difference between the cost of the participating interest and the Company's proportionate share of the net fair value of the entity's identifiable assets and liabilities is accounted for as follows:

(a) Goodwill relating to the entity is included in the carrying amount of the participating interest.

(b) Any excess of the Company's proportionate share of the net fair value of the entity's identifiable assets and liabilities over the cost of the investment is included as income in the determination of the Company's proportionate share of the entity's profit or loss in the period in which the participating interest is acquired.

The participating interest in the net income of the entities is recognized in the consolidated statements of comprehensive income.

The unrealized gains and losses resulting from transactions between the Company and its jointly controlled entities are eliminated to the extent of the Company's interest in the joint ventures.

Fixed assets

Fixed assets are initially recorded at cost, including acquisition fees and all the preparation fees directly related to the asset before it can be used, less related research and development investment tax credits. Subsequent to the initial measurement, fixed assets are recorded at cost, less accumulated amortization and depreciation.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Amortization is recognized on a straight-line basis, in line with the assets useful life, as follows:

	Method	Periods
Furniture	Straight-line	5 years
Computer equipment	Straight-line	3 years
Computer equipment for ZRx Prescriber	Straight-line	3 years
Leasehold improvements	Straight-line	5 years

The Company allocates the amount initially recognized in respect of a fixed asset to its significant parts and depreciates separately each such part. Residual values, method of amortization and useful life of the assets are reviewed annually and adjusted if appropriate.

Gains and losses on disposals of fixed assets are determined by comparing the proceeds with the carrying amount of the asset and are included as part of other gains and losses in the consolidated statements of comprehensive income.

Intangible assets

The Company's intangible assets include Website, intellectual properties, licenses and rights, development costs and software with finite useful lives. These assets are capitalized and amortized on a straight-line basis in the consolidated statements of comprehensive income over the period of their expected useful life as follows:

	Periods
Website	3 years
Software	2 years
Intellectual properties	10 years
Licenses and rights	3 years
Development costs	3 years

Expenses related to development activities which do not meet generally accepted criteria for deferral and research activities are expensed as incurred. Development expenses which meet generally accepted criteria for deferral are capitalized and amortized against income over the estimated period of benefit.

The ZRx Prescriber intellectual property is recorded at cost and is amortized over a ten-year period from the marketing date of the product, which is November 2006. The PraxisLab intellectual property is recorded at cost and is amortized over a ten-year period from the date of acquisition.

The ZRx Prescriber development costs, which include the development of ZoomMed's communication network and the additional new functionalities, according to future economic benefits, are amortized using the straight-line method over a three-year period from the implementation date of the product.

PraxisLab development costs and additional new functionalities, according to future economic benefits, are amortized using the straight-line method over a three-year period from the implementation date of the product.

Research and development tax credits

The Company is entitled to scientific research and development tax credits. Tax credits are accounted for using the cost reduction method. Accordingly, tax credits are recorded as a reduction of the related expenses or capital expenditures in the period in which those expenses are incurred, provided there is reasonable assurance that the credits will be realized.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Impairment of long-term assets non-financial

Non-current assets with indefinite useful lives are not amortized and are tested for impairment annually. Non-current assets with a finite useful life are assessed for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable. Management is required to asses at each reporting date whether there is any indication that an asset may be impaired. Where such an indication exists, the asset's recoverable amount is compared to its carrying value and an impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows or cash-generating units ("CGU"). In determining value in use of a given asset or CGU, estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Non-current assets with finite useful life that suffered impairment are reviewed for possible reversal of the impairment if there has been a change, since the date of the most recent impairment test, in the estimates used to determine the impaired asset's recoverable amount. However, an asset's carrying amount, increased due to the reversal of a prior impairment loss, must not exceed the carrying amount that would have been determined, net of depreciation or amortization, had the original impairment not occurred.

Lease inducement

The lease inducement includes the difference between the rental expense apportioned over the lease term according to a systematic formula and the minimum lease payment, considering the inducements.

Operating Leases

Leases under which the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments under an operating lease (less benefit received from the lessor) are recognized in the consolidated statements of comprehensive income on a straight line basis over the lease term.

Shareholders' equity

Common shares are classified as equity and are recorded in the Shareholders' Equity at their issuance value. Incremental costs directly attributable to the issuance of shares and stock options are shown in equity as a deduction (as a deficit increase) net of tax from the proceeds. Transactions with shareholders are shown separately in equity.

Income taxes

Income taxes are accounted for, by the Company, based on the consolidated statements of financial position method. Accordingly, future income tax assets and income tax liabilities are measured using the income tax rates that are most likely to apply during the fiscal year where the asset is realized or the liability is settled, based on the income tax rates (and tax regulations) adopted or nearly adopted as at the reporting date. As appropriate, a valuation allowance is recognized to decrease the value of future tax assets to an amount that is more likely than not to be realized.

Employee's benefits

Wages, contributions to government pension plans, paid vacations and sick leaves, bonuses and non-monetary benefits are short-term benefits and are recognized over the period during which the employees of the Company have rendered the related services.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Stock-based compensation

The Company offers a stock-based compensation plan. The Company uses the fair value based method of accounting as regards to stock options granted to its Officers, Directors, Employees and Consultants. The fair value of stock options is determined using the Black-Scholes option pricing model, and the stock-based compensation costs are recorded in the consolidated statements of comprehensive income at the granted date and credited to contributed surplus.

Any consideration received by the Company in connection with the exercise of stock options is credited to share capital and contributed surplus component of the stock-based compensation is transferred to share capital upon the issuance of shares.

Accounts denominated in foreign currencies

Presentation currency and foreign currency operations – The Canadian dollars is the Company's presentation currency, which is also the Company's functional currency.

Foreign currency transactions are translated into the functional currency environment in which the entity operates using the exchange rates prevailing at the dates of the transactions. Assets and liabilities denominated in foreign currencies at the closing date are converted into functional currencies at the exchange rates prevailing at the same date. All resulting changes are recognized in the profit or loss, except monetary items included into foreign institution net investment.

Foreign institutions - Foreign intuitions' assets and liabilities denominated in functional currencies other than Canadian dollars are converted into Canadian dollars using the exchange rates prevailing at the closing date. Foreign institution revenue and expenses are converted into Canadian dollars using the exchange rates prevailing at the date of the transaction. Shareholders equity is converted at the original effective rate prevailing at the closing date. All resulting changes are recognized in other comprehensive income until the net investment is disposed of, or reclassified in the profit or loss. Since the transition date, no such resulting change was recorded as foreign institutions conversion adjustments.

Basic and diluted net earnings per share

Basic and diluted net earnings per share are calculated using the weighted average number of outstanding common shares during the fiscal year. The Company uses the treasury stock method to determine the dilutive effects of stock options and warrants when cumulating diluted earnings per share. Accordingly, the calculation of diluted earnings per share is made using the treasury stock method, as if all potentially dilutive participating shares had been exercised at the later of the beginning of the period or the date of issuance, as the case may be, and that the funds obtained thereby had been used to purchase common shares of the Company at the average market value of the common shares during the period.

When funds are received, at the date of issuance of dilutive instruments, the net amount is adjusted net of tax expenses related to these instruments. For the three-month period ended August 31, 2013 and 2012, the conversion of the debenture into common shares is anti-dilutive.

The diluted net earnings per share are equal to the basic net earnings per share because of the anti-dilutive effect of stock options and warrants when a loss is incurred, and/or that the stock options and warrants are issued at a price exceeding the average market price.

4. ACCOUNTING STANDARDS ISSUED BUT NOT YET APPLIED

Financial Instruments

In October 2010, the International Accounting Standards Board “IASB” issued IFRS 9, “Financial Instruments”, which represents the completion of the first part of a three-part project to replace IAS 39, “Financial Instruments: Recognition and Measurement”, with a new standard. Per recent updates to IFRS 9, an entity choosing to measure a liability at fair value will present the portion of the change in its fair value due to changes in the entity’s own credit risk in the other comprehensive income or loss section of the entity’s statement of comprehensive income, rather than within net results.

Thus, to determine whether a financial asset is measured at amortized cost or fair value, IFRS 9 uses a single approach that replaces the multiple rules in IAS 39. The recommended approach in IFRS 9 is based on how an entity manages its financial instruments and the characteristics of the contractual cash flows of financial assets.

This standard will be effective for financial statements periods beginning on or after January 1, 2015. Earlier application is permitted. The Company intends to adopt this new standard as its effective date. The Company has not yet assessed the potential impact of these new guidelines on its consolidated financial statements.

Reporting entity

In May 2011, the IASB issued a group of five new standards that address the scope of the reporting entity: IFRS 10 “Consolidated financial statements”, IFRS 11 “Joint arrangements”, IFRS 12 “Disclosure of interests in other entities”, IAS 27 “Separate financial statements” and IAS 28 “Investments in associates”.

Consolidation - IFRS 10 replaces all previous provisions related to control and consolidation stated in IAS 27 "Separate Financial Statements" and SIC-12 "Consolidation - Special Purpose Entities". IFRS 10 amends the definition of control and provides a single definition of the concept of control, which is characterized by the holding power of the entity, the exposure or the rights to variable returns of the entity. Power means the ability to manage the activities in a way that could significantly affect returns. Returns must vary and can be positive or negative, or both.

Joint arrangements - IFRS 11 amends the definition of a joint agreement so that it includes only two types of agreements: joint activities and joint ventures. Under this standard, the proportionate consolidation method is no longer permitted to account for jointly controlled entities, and the use of the equity method is mandatory for all participants in a joint venture. The entities involved in joint activities will use an accounting method very similar to the one that currently applies to jointly controlled assets and jointly controlled activities.

Disclosures of interests in other entities - IFRS 12 establishes requirements for disclosure applicable to entities subject to the provisions of IFRS 10 and IFRS 11, thereby replacing the requirements information set out in IAS 28. Under IFRS 12, entities should provide information that helps users of financial statements to evaluate the nature, risks and financial effects of the entity interests in subsidiaries, associated companies, joint agreements and unconsolidated structured entities.

Separate financial statements - The revision of IAS 27 removes the concepts, now contained in IFRS 10, to only retain in IAS 27, the concepts relating to individual financial statements.

Investments in associates and joint ventures - Modifications have been made to IAS 28 to incorporate changes resulting from the issuance of IFRS 10 and IFRS 11, including the fact that joint ventures must now always be accounted for using the equity method.

These standards are required to be applied for accounting periods beginning on or after January 1, 2013, with earlier adoption permitted. The Company intends to adopt these new standards as their effective date. The Company is currently assessing the potential impact of these new standards on its consolidated financial statements.

4. ACCOUNTING STANDARDS ISSUED BUT NOT YET APPLIED (CONT.)

Fair value measurement

In May 2011, the IASB issued IFRS 13 "Fair value measurement". This standard will improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRS. IFRS 13 will be effective for fiscal years beginning on or after January 1, 2013, with earlier application permitted. The Company intends to adopt this new standard as its effective date The Company is currently assessing the potential impact of this new standard on its consolidated financial statements.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of consolidated financial statements in accordance with IFRS often requires management to make estimates about and apply assumptions or subjective judgment to future events and other matters that affect the reported amounts of the Company's assets, liabilities, revenue, expenses, and related disclosures. Assumptions, estimates and judgments are based on historical experience, expectations, current trends and other factors that management believes to be relevant at the time at which the Company's consolidated financial statements are prepared. Management reviews, on a regular basis, the Company's accounting policies, assumptions, estimates, and judgments in order to ensure that the consolidated financial statements are presented fairly and in accordance with IFRS.

Critical accounting estimates and judgments are those that have a significant risk of causing material adjustment and are often applied to matters or outcomes that are inherently uncertain and subject to change. As such, management cautions that future events often vary from forecasts and expectations and that estimates routinely require adjustment.

Management considers the following areas to be those where critical accounting policies affect the significant judgments and estimates used in the preparation of the Company's consolidated financial statements.

Estimated useful life

The management assesses fixed assets in line with the assets useful life. The amount and the related fixed assets amortization timetable for a given period are influenced by their estimated useful life. The estimations are reviewed at least once a year and are updated if the useful life expectations are altered by physical wear, technical and commercial obsolescence.

Intangible assets

The values associated with identifiable intangible assets with finite useful life are determined by applying significant estimates and assumptions.

Valuations performed in connection with post-acquisition assessments of impairment of identifiable intangible assets are based on estimates that include risk-adjusted future cash flows. Projected cash flows are based on business forecasts, trends and expectations and are therefore inherently judgmental. Future events could cause the assumptions utilized in impairment assessments to change, resulting in a potentially significant effect on the Company's future operating results due to increased impairment charges, or reversals thereof, or adjustments to amortization charges.

Fair value of stock options

Determining the fair value of the stock options requires judgment related to the choice of a pricing model, the estimation of stock price volatility and the expected term of the underlying instruments. Any changes in the estimates or inputs utilized to determine fair value could result in a significant impact on the Company's future operating results or other components of shareholders' equity.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (CONT.)

Government assistance

The Company is entitled to government assistance in the form of research and development tax credits and grants. These are applied against related expenses and the cost of the asset acquired. Tax credits are available based on eligible research and development expenses consisting of direct and indirect expenditures and including a reasonable allocation of overhead expenses. Grants are subject to compliance with terms and conditions of the related agreements. Government assistance is recognized when there is reasonable assurance that the Company has met the requirements of the approved grant program or, with regard to tax credits, when there is reasonable assurance that they will be realized.

Going concern

The assessment of the Company's ability to execute its strategy by funding future working capital requirements involves judgment. The current situation indicates the existence of a material uncertainty which may cast significant doubt upon the Company's ability to continue as a going concern. Further information regarding going concern is outlined in note 2.

6. ACCOUNTS RECEIVABLE

	August 31, 2013	May 31, 2013
	$	$
Accounts receivable (1)	5,269	58,606
Sales tax	19,569	-
Accounts receivable – Joint venture (1)	-	925,800
Research and development tax credits (2)	400,000	400,000
	424,838	1,384,406

(1) No impairment was required on accounts receivable as of August 31, 2013 and May 31, 2013.

The company's net book value of accounts receivable is $5,269 ($984,406 as at May 31, 2013) at the closing date. The terms of these accounts receivable are detailed in the following table:

Breakdown of accounts receivable :

	August 31, 2013	May 31, 2013
	$	$
0 à 30 days	1,772	348,726
31 à 60 days	-	326,032
61 à 90 days	115	308,600
Plus de 90 days	3,382	1,048
	5,269	984,406

(2) The exact amount will be known when Revenu Québec will process and approve the claim. Approved amount could differ from the recorded amount.

10. ACCOUNTS PAYABLE

	August 31, 2013	May 31, 2013
	$	$
Accounts payable and accrued liabilities	324,216	324,068
Wages and deductions at source	304,804	357,376
Sales tax	-	2,355
	629,020	683,799

11. CONVERTIBLE DEBENTURE

On September 30, 2011, the Company has issued a secured convertible debenture for a nominal amount of $1,500,000, such convertible debenture being convertible at the sole option of the holders thereof into common shares of the share capital of the Company on the basis of one common share for each $0.15 in principal amount of convertible debenture. Furthermore, 10,000,000 common shares purchase warrants were issued. Each warrant entitles the holder thereof to purchase one common share at a price of $0.15 per share for 24 months following the closing date. The convertible debenture matures 24 months from the date of issuance or such earlier date which may be provided for as a redemption feature. Subject to certain conditions, the Company may redeem all or any portion of the convertible debenture upon 30 days written notice to the holders thereof in which case such holders may exercise their conversion rights, in whole or in part, prior to the intended date of redemption. The convertible debenture bears a nominal interest rate of 15% per annum and matures in September 2013. The convertible debenture is secured by a movable hypothec on the assets of the Company and a promissory note.

On October 18, 2013, the Company proceeded with the closing of a secured debenture and the repayment of the existing convertible debenture. See a brief description of the terms of the new debenture describe at note 21.

The net proceeds from the issuance of the convertible debenture has been separated into a liability component and an equity component, representing the residual amount attributable to the conversion option of the liability into equity of the Company as shown in the following table:

Proceeds from issuance	$	1,500,000
Fair value of the liability component, at the date of issue, for a similar instrument that does not have an equity conversion		(1,425,797)
Fair value of the equity component	$	74,203

Issuance costs were proportionally allocated to the liability and the equity components. The $1,262,140 liability component, net from the $163,657 issuance costs, is measured at amortized cost, using 25.35% effective interest method. The $65,686 equity component, net of the $8,517 issuance costs, is shown as equity component of convertible debenture into equity.

11. CONVERTIBLE DEBENTURE (CONT.)

Interest expenses on this loan are calculated by applying an effective interest rate of 25.35%. The liability component is measured at amortized cost. The difference between the carrying value of the $1,262,140 liability component, at the date of issuance and the $1,488,096 ($1,452,1728 as at May 31, 2013) amount presented in the consolidated statement of financial position, as at August 31, 2013, reflects the effective interest rate, less interest paid as of that date.

12. INFORMATION ON OPERATING EXPENSES

	August 31, 2013	August 31,2012
	$	$
a) Selling expenses :		
Selling expenses	82,982	51,999

c) Transaction during the period ended August 31, 2013

No transactions occurred during the period ended August 31, 2013.

d) Transaction during 2013

No transactions occurred during the fiscal year ended May 31, 2013.

e) Share capital reconciliation

	Number	Declared $
Balance as at August 31, 2013 and May 31, 2013	130,474,687	25,438,120

15. STOCK OPTION PLAN

The shareholders of the Company adopted a resolution approving the “rolling” stock option plan of 10% at the annual and special meeting of shareholders held November 23, 2012. Under the plan terms, the exercise price of the options will be determined by the Directors of the Company subject to other restrictions described in the plan and some requirements of the TSX Venture Exchange. The maximum period for which an option can be exercise is limited to five years and the exercise price must be paid in full before the issuance of the shares.

15. STOCK OPTION PLAN (CONT.)

The following table summarizes the changes in the plan position for the three-month period ended August 31, 2013 and the fiscal year ended May 31, 2013:

	Options	Average exercise price
		$
Balance as at June 1, 2012	9,252,500	0.18
Awarded	3,830,000	0.10
Cancelled	(245,000)	0.18

12,837,500	36	0.15	0.07	12,837,500	0.15

Transaction during 2013

In July 2012, the Company granted 3,830,000 stock options allowing their holders to acquire 3,830,000 common shares, at an exercise price of $0.10 per share, for a period of five years.

The fair value of the stock options awarded during the fiscal year ended May 31, 2013 was estimated on the grant date using the Black-Scholes' options pricing model with the following assumptions:

Date	July 20, 2012
Quantity	3,830,000
Stock price	$0.045
Dividend yield	Nil
Expected volatility	158%
Risk-free interest rate	1.15%
Expected life	60 months

The stock-based compensation expense amounts to $153,200 for the fiscal year ended May 31, 2013.

16. WARRANTS

The following table summarizes the changes in the plan position for the three-month period ended August 31, 2013 and the fiscal year ended May 31, 2013.

	Warrants	Weighted average Exercise price	Value
		$	$
Balance as at June 1, 2012	18,711,768	0.16	768,676
Warrants expired	(8,711,768)	0.17	(768,676)
Balance as at May 31, 2013	10,000,000	0.15	-
	-	-	-
Balance as at August 31, 2013	10,000,000	0.15	-

16. WARRANTS (CONT.)

a) Transaction during the period ended August 31, 2013

No transactions occurred during the period ended August 31, 2013

Outstanding warrants			
Number	Weighted average remaining contractual life (months)	Weighted average exercise price	Weighted average fair value
		$	$
10,000,000	1	0.15	-

b) Transactions during 2013

On February 8, 2013, 6,941,961 warrants, with an exercise price of $0.17 each, have expired. These warrants were cancelled and the total carrying value, which was $624,082, was transferred to the contributed surplus.

On March 28, 2013, 1,769,807 warrants, with an exercise price of $0.17 each, have expired. These warrants were cancelled and the total carrying value, which was $144,594, was transferred to the contributed surplus.

The following table summarizes the information about the outstanding warrants owned by public investors and agents as at May 31, 2013:

Outstanding warrants			
Number	Weighted average remaining contractual life (months)	Weighted average exercise price	Weighted average fair value
		$	$
10,000,000	4	0.15	-

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

Financial assets	**August 31, 2013**		**May 31, 2013**	
	Fair value	Carrying value	Fair value	Carrying value
	$	$	$	$
Cash and cash equivalents	259,580	259,508	365,824	365,824
Loans receivables	5,270	5,270	984,406	984,406
Financial liabilities				
Other liabilities	127,216	127,216	139,251	139,251
Convertible debenture	1,496,720	1,488,096	1,486,096	1,452,178

The fair value of cash and cash equivalents, loans, receivables and other liabilities approximates their carrying value, because of the relatively short maturity of these instruments.

17. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONT.)

The Company categorizes its financial assets and liabilities measured at fair value using a hierarchy that consists of three levels, which reflects the significance of inputs used in their evaluation. The hierarchy of the fair value consists of the following levels:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. An active market for an asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Inputs that are supported by little or no market activities and that are significant to the fair value of assets or liabilities.

As at August 31, 2013 and May 31, 2012, the only financial instruments measured at fair value in the consolidated statements of financial position consist of cash and cash equivalents and were all classified in level 1.

18. RISK MANAGEMENT OF FINANCIAL INSTRUMENTS

The Company, through its financial instruments, is exposed to various risks without being exposed to risk concentrations. The Company is primarily exposed to credit risk, interest rate risk, market risk, liquidity risk and key personnel risk.

a) Risks associated with financial instruments

Credit risk management

Credit risk is the risk of financial loss for the Company, if a debtor does not meet its obligation. This risk arises mainly from the credit the Company grants its customers in the normal course of its activities.

Credit evaluations are performed continuously and the consolidated statements of financial position reflect a provision for doubtful debts. No qualitative assessment has been made, management has assessed the credit risk was not significant.

Currency risk management

The currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rate.

In the normal course of its operations, the Company is exposed to the risk of variations in the exchange rate of the U.S. dollar.

As at August 31, 2013, the Company has the following balance in converted U.S. dollars: cash: $133,623. As at May 31, 2013 the Company has the following balance in converted U.S. dollars: cash: $290,603 and accounts receivable: $925,800.

Interest rate risk management

The interest rate risk exists in times of fluctuating rates and when differences are expected in the cash flow matching of assets and liabilities.

18. RISK MANAGEMENT OF FINANCIAL INSTRUMENTS (CONT.)

The Company has no debt bearing interest at variable rates. In addition, it invests part of its liquidity in guaranteed interest rate financial instruments. These financial instruments represent a minimal risk for the Company.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to this risk mainly regarding its creditors and its convertible debenture.

In order to meet additional capital requirements, the Company may consider collaborative arrangements and additional public or private financing to fund all or a part of particular product development programs. Private financing could include the incurrence of debt and the issuance of additional equity securities, which could result in dilution to shareholders. There can be no assurance that additional funding will be available. The Company manages this risk by establishing detailed cash forecasts, as well as long-term operating and strategic plans. According to these forecasts, most of its cash flows for operating activities will be generated by the ZRx Prescriber, PraxisLab and ZoomMed's communication network.

b) Other risks

Market risk

The future performance of the Company is dependent on the continued popularity of its existing products and its ability to develop and introduce products that gain acceptance and satisfy consumer preferences in targeted markets. The popularity of any of its products may decline over time as consumer preferences change or as new competing products are introduced in targeted markets. The development of new systems and their distribution within the targeted market, require significant investments.

Key personnel risk

Recruiting and retaining qualified personnel is essential to the Company's success. The Company believe that it has been successful in recruiting excellent personnel to help it meet their objectives but, as its activities grow, it is possible that additional key personnel in departments like; administration, research and development, as well as marketing will be required. Although the Company believe that it will be successful in attracting qualified personnel, there can be no assurance to that effect.

19. CAPITAL DISCLOSURES

In regards to capital management, the Company's objective, from the beginning of its operations, is the continuity of its operations in order to carry on with the development and marketing of the ZRx Prescriber, PraxisLab and ZoomMed's communication network, the protection of its assets, while maximizing the shareholders return on investment. The Company is not subject to any externally imposed capital requirements. The Company has several options regarding its capital needs. See Note 18 for more details.

The Company defines its capital as the sum of its shareholders equity and convertible debenture. The shareholders equity ($1,165,396 as at August 31, 2013 and $2,158,988 as at May 31, 2013) includes: share capital, equity component of convertible debenture, warrants, contributed surplus and deficit. Convertible debenture accounts for $1,488,096 as at August 31, 2013 and $1,452,178 as at May 31, 2013. The $993,592 equity decrease during the three-month period ended August 31, 2013 is due to the deficit of the period.

20. RELATED PARTY TRANSACTIONS

a) Key management compensation

Key management is those persons having authority and responsibility for planning, managing and controlling the Company's activities, including the Directors and Executives.
